CSF Custom Skim Coat Flange

CUF Custom Upstand Flange

CVF Custom Visible/Plain Flange

C Series

CEC__ Custom End Cap, available any size for manufacture locally

CC Custom Door/cover, available in 65, 75, 85, 95, 115, 125, 150, and 200mm

Tracktrim

TTMF Tracktrim Drapery Track Motor Box containment for Lutron

TTRF Tracktrim Drapery Track Return for Lutron

TT1F Tracktrim drapery track with fixing track

TR508 Tracktrim 508` Curve track

Also available for order,
Curve radius 250°, 290°, 300°, 330°, 365°, 440°, and 480°
Tracktrim for Somfy, Coulisse, Erfal, Goelst, Crestron, and Silent Gliss

Order Creation

M Series

3. Next you decide on a door/cover option.

The 50mm (MC50) and 60mm (MC60B) options are intended for the M100x100 and the 80mm (MC80) and 90mm (MC90B) options are intended for the M130x130.

You can choose a brush edge option or a plain edge depending on your preferred look/function.

Here are visuals of each option

Example continued...

We could add equivalent lengths of the MC60B and MC90B
The order would now look like,

Product	Quantity
M130x130 (5m)	4
M100x100 (precut)	3' and 4'
MC90B (5m)	4
MC60B (precut)	3' and 4'

Order Creation

M Series

4. Determine which type of flanges and/or side covers you will have. You can have one on each side. Two flanges, one flange and one finished side, or two finished sides.

MSF
Modular skim coat
flange

MPF
Modular Plain or Visible
flange

MSC100
Modular 4" Finished
Side Cover

MSC130
Modular 5" Finished
Side Cover

Flanges offer a mud in or paint in finish, whereas side covers offer a snug fit to the enclosure and/or a tight space solution.

Our most popular option is the skim coat or mud-in flange (MSF), this is a very clean finish that works well with compatible ceilings.

Here are some finished configuration visuals.

Feel free to call us at +1 (877) 587-4233 or email support@lightandshadesolutions.net for support choosing your modular setup

5. (Example Portion)

Determine which type of flanges and/or side covers you will have.

MSF
Modular skim coat
flange

MPF
Modular Plain or Visible
flange

MSC100
Modular 4" Finished
Side Cover

MSC130
Modular 5" Finished
Side Cover

Ex.

Let's say the M100x100s have MSC100 and MSF
And the M130x130s have two MSF

The excess MSF from the M130x130s is long enough to be used on the M100x100s, so 8 5m lengths is enough

Product	Quantity
M130x130 (5m)	4
M100x100 (precut)	3' and 4'
MC90B (5m)	4
MC60B (precut)	3' and 4'
MSF (5m)	8
MSC100 (precut)	4' and 3'

Feel free to call us at +1 (877) 587-4233 or email support@lightandshadesolutions.net for support choosing your modular setup

Order Creation

M Series

6. Based on the number of enclosures, add 2 equivalent MEC
If you have an enclosure with two MSFs, you have the choice of using the MEC__x__Fs as shown below.
Consider any splice kits needed and add accordingly.
Add at least two hinges (MCH) per enclosure, also recommended to have one at least every 3 feet.

Example continued...

We could add 12 MEC130x130Fs and 4 100x100 MEC100x100s
The order would now look like,

Product	Quantity
M130x130 (5m)	4
M100x100 (precut)	3' and 4'
MC90B (5m)	4
MC60B (precut)	3' and 4'
SPLA1	1
MSF (5m)	8
MSC100 (precut)	4' and 3'
MEC130x130F	12
MEC100x100	4
MCH	21

7. Decide if any additional attachments are needed.

MBH
Modular Brush
Holder

Attaches opposite to the door/cover, usually with a brush door/cover

MLB
Modular Lutron
Bracket

Used to hang a Lutron brand shade inside a M Series box (shade can be hung with just the standard Lutron bracket, this is an alternative, both can work) Sold in 1m pieces

MWH
Modular Wall
Hinge

For use of the M Series door/cover system without a M Series box, attaches to a wall or built-in shade pocket

MLB Pieces Ratio

Pieces Recommended	Shade Length
1	< 6'
2	< 9'
3	< 12'
4	< 15'

Visual of MBH used with the MC60B in a complete box

Order Creation

C Series

1. Layout your purpose and plan for the boxes. Note the specified roller shade sizes. Consider any special configurations.

If you plan to do something unique in regards to configuration with the C Series, there are many options on how the C Series can be used.

The most common is to create two layers of shades in one box. Be careful in your calculations when creating a box for these, make sure and leave some leeway in the box for installation and movement. Keep in mind the size roller shades you are using as well. Use the previous page information as well as your configuration intent to create your size.

Feel free to call us at +1 (877) 587-4233 or email support@lightandshadesolutions.net for support choosing your custom setup

Order Creation

C Series

3. Choosing flanges

You need to have a flange on either side of a C series set up. You can have two different or the same depending on the intended use.

CNF - Custom Blank or No Flange

CPF - Custom Perforated Flange

CSF - Custom Skim Coat Flange

CUF - Custom Upstand Flange

CVF - Custom Visible/Plain Flange

Once you've chosen your order will look something like this.

Product	Quantity
C200x200	1
CC150	1
CEC200x200	2
CSF	2
CCH	10

Feel free to call us at +1 (877) 587-4233 or email support@lightandshadesolutions.net for support choosing your custom setup
