BL'NDSPACE[®]

SHADE ENCLOSURES

MODULAR **M SERIES**

Blindspace® M Series is a superior concealment box with black anodized interior to minimize light transmission and external faces powder coated to specified RAL color. The box is installed during construction with the space accessible for shade installation when the room is completed. It features the patented Blindspace® Safety Hinge that secures the cover in place and can be installed in any direction, allowing for side boxes to hide shade side channels or guide wires. Popular in floor-to-ceiling windows and sliding doors, M Series can be installed to future-proof buildings to have the option to install concealed shades in the future.

STANDARD S **SERIES**

Blindspace® S Series is a concealment box made to hide roller blinds with minimal visual impact. The box is installed during construction with the space accessible for blinds installation when the room is completed. It features the patented Blindspace® Safety Hinge that secures the cover in place and can be installed in any direction, allowing for side boxes to hide blind side channels or guide wires. Popular in floor-to-ceiling windows and sliding doors, S Series can be installed to future-proof buildings to have the option for later installation of concealed blinds.

CUSTOM C SERIES

Blindspace® C Series boxes can be made to any size, to conceal all types of shades, achieving minimal visual impact. The box is installed during construction with the space accessible for shade installation once the room is completed. It features the patented Blindspace® Safety Hinge that secures the cover in place and can be installed in any direction, together with side boxes to hide shade side channels and/or guide wires. Custom C Series boxes are used for very large shades, double shades, gable shades and skylight shades. C Series boxes can also be installed to future-proof buildings to have the option to install concealed shades later.

TRACKTRIM

Tracktrim® by Blindspace is a perfect fit solution to recess manual and electric curtain tracks. The track and end set are installed flush with the ceiling during construction to form a cavity matching the drapery system and can be painted to match the ceiling. Standard curved sections are available to fit corners, curved walls, bay windows and other applications. When curtain tracks are installed, the result is a minimalist design where curtain tracks fully blend in, flush with the ceiling. Available for Lutron, Somfy, Silent Gliss, Crestron, QMotion, Goelst, Coulisse, Erfal, Trietex, and many manual drapery brands.
